Diego Alejandro Albarracin Maldonado

Bogotá, D.C, Colombia

diegoalbarracin0405@gmail.com | linkedin.com/in/diego4lbarracin | github.com/diego4lbarracin | diego4lbarracin.com

Final-year Systems Engineering student with strong foundations in computer science, cloud computing, and software development using modern programming languages, complemented by knowledge of economics and finance. Proven ability to convey technical concepts effectively and professional proficiency in both English and Spanish.

EDUCATION

Pontificia Universidad Javeriana

July 2022

Bachelor of Engineering, Systems Engineering

Expected Graduation Date: June 2026 | CGPA: 4.0 / 5.0

Relevant Coursework: Distributed Systems, Software Architecture, Cloud Computing, Analysis of Algorithms, Data Structures and Algorithms, Databases, Analysis and Software Design, Object-Oriented Programming, Microeconomics, Principles of Economics.

Universidad Industrial de Santander

April 2022 – November 2022

Diploma of Education, Misión Tic 2022 Learning Route 2

Relevant Coursework: Fundamentals of programming with Python, Object-Oriented Programming with Java, Introduction to web development with JavaScript, HTML and CSS.

EXPERIENCE

Pontificia Universidad Javeriana

Tutor for Data Structures and Algorithms

February 2024 – July 2024

I supported more than 25 students enrolled in the Data Structures and Algorithms class by solving their doubts and assisting them with their difficulties understanding different data structures, algorithms and their complexity using C++ as programming language.

Teleperformance

Costumer Service Associate

December 2023 – January 2024

I provided comprehensive support, addressed customer inquiries, resolved issues, and ensured overall customer satisfaction to 800+ English-speaking customers via telephone.

Pontificia Universidad Javeriana

Tutor for Introduction to Programming

February 2023 – November 2023

I supported more than 60 students enrolled in the Introduction to Programming class by solving their doubts and helping them with their common problems related to learning the fundamentals and logic of programming using C++.

EXTRACURRICULAR ACTIVITIES

ACM Chapter Javeriana

Board member of the ACM Chapter Javeriana

January 2023 – January 2025

I delivered lessons about Introduction to Programming and Object-Oriented Programming (OOP) to more than 100 undergraduate students, focusing on improving their understanding of fundamental concepts prior to their tests. Additionally, from January 2024 to June 2024, I lectured the foundations of computer programming to 8 students from a public school of Bogotá using JavaScript.

HONORS & AWARDS

Andres Bello Distinction | Ministry of National Education

December 2022

Awarded the “Andres Bello” distinction for have gotten excellent results in the “Saber 11” test in the urban and rural category in the year 2021.

Generación E, Excelencia | Scholarship | Ministry of National Education

June 2022

Awarded the “Generacion E, Excelencia” scholarship to fund my higher education as a recognition of my academic excellence as a high school graduate in the year 2022.

TECHNICAL SKILLS

Comfortable: C++, Java, Git, Microsoft Office Suite (Excel, Word, etc.). | Familiar: AWS Cloud Services, Linux, SQL, Python, JavaScript, Spring Boot, HTML, CSS.

LANGUAGES

English (C1)
Spanish (Native)

LICENSES & CERTIFICATIONS

AWS Certified Cloud Practitioner

October 2024

PROJECTS

MyPets | Databases Class

Developed a Java application with a JavaFX GUI and a custom relational database to manage a fictitious veterinary clinic.

Battleship New Generation | Object-Oriented Programming

Designed and developed a version of the game “Battleship” in Java using a console-based GUI by applying concepts from my object-oriented programming class and knowledge acquired in previous courses.

Password Generator | Introduction to Programming

Developed a simple password generator with 3 different options to create a password using C++.
